Prompt: “Before / After” Edit Showcase Reel (Edito Hub style)

Format: Vertical 9:16, 720×1280 (or 1080×1920), 29.97 fps, **11.7 seconds**, no hard cuts on the outer frame. The whole video is one static “stage” with two cards on it.

Reference frames from the original video at 1.5 s, 3.0 s, 5.75 s, 7.9 s and 10.7 s

1. The stage (constant for the full 11.7 s)

- **Background:** Smooth vertical gradient. Pure white (#FFFFFF) at the top third, fading to a mid-grey (#7A7A7A to #8C8C8C) at the bottom. It reads like a seamless studio floor. No texture and no vignette.
- **Two portrait video cards, side by side, slightly overlapping in depth:**
  - **BEFORE card (left, smaller, further back):** about 40% of frame width. It bleeds off the left edge (x ≈ 0–290 px on 720 wide) and sits lower (y ≈ 380–900). Rounded corners (~20 px). Very slight 3D Y-rotation, so the card angles gently toward the centre. Soft drop shadow.
  - **AFTER card (right, larger, in front):** about 55% of frame width. It bleeds off the right edge (x ≈ 320–720), is taller and sits higher (y ≈ 280–1000). Same rounded corners and a slight tilt: the top edge rises a little to the right. Stronger soft shadow. Its bottom edge fades into the grey floor.
- **Labels** above each card, in a heavy, wide, black geometric display font (Archivo Black, Druk Wide or Monument Extended style), all caps, with slight perspective to match each card:
  - “BEFORE”: small, centred above the left card (y ≈ 355).
  - “AFTER”: about 1.4× larger, centred above the right card (y ≈ 250).
- The cards and labels stay fixed for the whole video. Only the card contents change.

2. BEFORE card content (0:00–11.7 s, one continuous take)

- Raw, unedited talking-head footage. A woman presenter in a black kurta with a gold/olive embroidered panel stands in a warm, softly lit room: a beige wall with window-shadow light patterns, a lamp on the left and dried pampas grass on the right.

- Wide medium shot (knees up). Flat, slightly warm colour, no graphics, no zoom, no cuts. She speaks to camera with natural hand gestures, such as palms together and an open-hand “explaining” gesture.
- This is the **same take** as the AFTER card, playing in perfect sync. That shows the edit was done on the same source footage.

3. AFTER card content: the edited version, beat by beat

The AFTER card plays the same footage, **punched in to a medium close-up (~1.3–1.5× zoom)** and colour-graded brighter with more contrast. Graphics are layered on top. Use snappy ease-out-back (overshoot) pop-ins, motion blur on all moves, and subtle continuous “float” on held elements.

Time	Visual on AFTER card
0.00–0.25	Presenter at medium close-up. The word **“SIRF”** begins to reveal at chest level, left side.
0.25–0.75	**“SIRF”** (left) and **“rupees”** (below it, offset right) in a bold rounded sans (Poppins/Montserrat ExtraBold). The fill is a mint-to-teal gradient (#9EE6D2 → #2E8F86) with a soft dark drop shadow. Each word slides up and fades in with motion blur, staggered by about 0.15 s. Her hands partly overlap the text, so the text should sit *behind* her hands (rotoscoped depth).
0.75–1.00	**“299”** slams in above her head: chunky, **3D-extruded**, glossy purple/indigo numerals (#3A2BD8 face, lavender #B9B2FF highlight, deep extrusion). It scales from 140% to 100% with overshoot, plus a quick blur-in.
1.00–2.00	Hold. “299” gently floats and wobbles a few degrees in 3D. Teal text stays put. Use a slow push-in on the footage.
2.00	Jump-cut zoom: the footage punches in slightly tighter and all previous text clears instantly.
2.00–2.50	**“video editing”** writes on left to right at the top of the card. It uses a bold rounded sans with a blue-violet gradient (#3B3BE0 → #7A5CFF), a lavender motion-blur smear and a soft echo trail behind the letters. At the same time, **three dark, glassy YouTube-style thumbnail cards** fan in at chest level, in front of her body (left, centre and right, slightly overlapping, centre one in front). They fade up from 0% opacity and rise into place.
2.50–4.00	Hold. Thumbnails slowly drift and float, and the text stays.

Time	Visual on AFTER card
4.00–4.25	“video editing” dissolves with a directional blur and the thumbnails fade out.
4.25–4.75	Clean presenter shot with a slow punch-in, no graphics.
4.75–5.00	A **glassy 3D app-icon tile** pops in at her left hand: a rounded square with an indigo-blue frosted-glass look and a white handshake icon. The label **“creators”** sits below it in thin, light-grey sans. Scale pop with overshoot.
5.75	A second glass tile pops in at her right hand: a person-plus-bar-chart icon, same style. The label **“brands”** fades in above it at about 6.25. Both tiles bob slightly, as if she is holding them.
6.25–6.50	Fast transition. The footage flashes and whip-dissolves to a **blank white-to-grey gradient** inside the card.
6.75	**Logo scene.** “Edito Hub” in a tall condensed thin sans (Bebas Neue Light or League Gothic). “Edito” appears in black first, then “Hub” fades in from light grey to black.
7.00–7.25	A **circular logo badge** rolls in from the right edge and settles centre: a white disc with a thick dark-navy ring, a black play-triangle/music-note mark and stacked text “EDITO HUB”. At the same time, **3D black film-reel/camera objects** slide into the top-left and bottom-right corners and stay partly cropped.
7.25–7.75	Bottom-left: **“ke sath”** in a black handwritten script font, with **“editing”** below it in a clean grey sans. Both fade and slide up.
7.75–8.75	Hold. The badge slowly rotates (~10°) and pulses, with a dotted outer ring appearing around it. Corner objects drift.
8.75–9.25	Badge drifts downward. The text and badge fade and blur out, and the corner objects slide away.
9.50	**Price scene.** “starting” types in at the top in a medium black sans. A **3D icon** pops in at the centre: a grey laptop with a large film reel, a pink/red music-note tag above it and a blue play button on its left.
9.75	A **dark-green swoosh band** sweeps diagonally behind the icon, from lower-left to upper-right, like a brush stroke.

Time	Visual on AFTER card
10.00	“just” (left) and “rupees” (below) fade in near the bottom.
10.50–11.00	**Money explosion:** a burst of dozens of banknotes flies outward from behind the icon, spinning with motion blur. At the same time, a huge **“299”** in condensed black numerals slams in between “just” and “rupees”, with a quick count-up or shake.
11.00–11.25	Hold, with notes still falling.
11.25–11.70	Everything fades out, leaving the empty gradient card. End.

4. Motion and style rules

- Every pop-in uses **ease-out-back** (about 10–15% overshoot) at 6–8 frames. Every exit uses **directional blur plus fade** at 4–6 frames.
- Apply **motion blur** to all moving graphics.
- Held graphics get a subtle idle float (±4 px, ±2° 3D rotation, about a 2 s loop).
- Text sits *behind* the presenter’s hands or body where it overlaps. Use roto or a person mask for depth.
- Colour palette: indigo/violet (#3A2BD8, #7A5CFF), mint/teal (#2E8F86), dark green (#1F5A45), black, white and grey.
- The AFTER footage is graded brighter, cleaner and slightly cooler than the warm, flat BEFORE footage.

5. Audio

- A Hinglish female voiceover drives the edit. Its lines match the on-screen words: *“Sirf 299 rupees... video editing... creators aur brands ke liye... Edito Hub ke saath editing... starting just 299 rupees.”*
- Upbeat, modern background music.
- **Sound effects** on every pop: whoosh on text reveals, pop/click on icons, riser plus impact on “299”, and a cash/money-burst sound at 10.5 s.

6. One-paragraph version (for AI video tools)

> Vertical 9:16 11-second ad on a white-to-grey studio gradient. A small “BEFORE” card on the left shows raw wide footage of a woman in a black embroidered kurta talking in a warm room. A larger, slightly 3D-tilted “AFTER” card on the right shows the same synced footage punched-in and graded, with kinetic motion graphics: teal “SIRF … rupees” text behind her hands and a glossy 3D purple “299” above her head; then blue-violet “video editing” text writing on with blur trails and three glassy YouTube thumbnails fanning in at her chest; then frosted-glass 3D icons labelled “creators” and “brands” floating at her hands; then a clean logo scene with “Edito Hub”, a rolling circular badge, 3D film reels in the corners and

> the script “ke sath editing”; finally “starting just 299 rupees” with a 3D laptop/film-reel icon, a green swoosh and an exploding burst of banknotes. Snappy overshoot pop-ins, motion blur, subtle floating idle motion, whoosh and pop sound effects, Hinglish voiceover.
