Custom Edit Prompt for Claude: Plot-Site Presenter in a Pink Kurti, Edited in the "Ludhiana ka agla Landmark" Style

> **Paste everything below into Claude, together with the raw clip** (`copy_F1DED482-…-compressed.mov`, HEVC, 864×1536, variable frame rate averaging about 20 fps, 42.07 s, stereo AAC 44.1 kHz).
> The reference style is the "Ludhiana ka agla Landmark" real-estate reel (`video_recreation_prompt.pdf`). Everything you need from it is restated in sections 3–6, so you don't need the PDF.

---

0. Your role and the order of work

You are a senior short-form video editor and motion designer. Edit the attached raw footage into a finished **9:16 Hinglish real-estate reel** for a plotted-colony project. Copy the reference's **two-tier kinetic typography, text animation, transitions, overlays, beat-cutting and sound design**. Change the **colours** to suit this footage: hot pink, denim blue, the project's marigold-yellow and royal-blue boundary wall, and the orange-to-lilac sunset sky.

Work in this order and don't skip a step:

1. **Check the transcript** in section 1.3 against the audio and correct any word I've misheard. Items marked **[verify]** are my best guess. Keep the spelling as **Roman-script Hinglish** the way she says it ("seedha", "bilkul", "khatam", "dekhiye").
2. **Fill in the caption plan.** Use the timeline in section 7, put her exact words into every row and confirm the HEADLINE word for each line. Output the plan as a table before you render.
3. **Build the edit** to that plan, using the specs in sections 2–6.
4. **Check it** against the QC list in section 10, then export to section 11.

Hard rules:

- **Never invent claims.** Prices, distances, road widths, approvals, the offer deadline, the project name, the developer name and any phone number must come from her speech, from the wall signage or from me. Anything else goes in the plan as `[PLACEHOLDER]` for me to fill in. RERA and JDA numbers, the phone number, the plot size and the address are **not** in the footage, so they are placeholders.
- **Stay in sync.** Every caption word appears on the frame its spoken syllable starts, within ±2 frames.
- **Pacing:** a visual change (cut, punch-in, transition or text build) at least every 2 s, and no static frame longer than 3 s.
- **Her face is never covered.** The top headline goes *behind* her head using a subject mask, and the lower caption goes over her kurti or jeans, never over her face.

---

1. About the footage

1.1 Presenter and location

- **Presenter:** a young woman with long, straight, dark hair, worn loose, and black-framed glasses. She wears a **hot-pink straight kurti with small white polka-dot embroidery**, three-quarter sleeves, over **wide-leg mid-blue denim jeans**, with flat sandals. She speaks Hinglish to camera with open-palm explaining gestures and counts on her fingers on "Number 1 / 2 / 3".

- **Location:** a new **plotted colony on open, flat, dry land near Jodhpur** at golden hour and dusk. There are gravel and dirt internal roads, concrete light poles, small yellow plot-marker pegs, young saplings in wire tree-guards, scattered khejri/neem trees, and a highway with a barbed-wire fence.
- **Signage:** a long **boundary wall painted marigold yellow with royal-blue Devanagari lettering**. It reads **"राम देव वाटिका ॥ धन्यवाद"** (Ramdev Vatika ॥ Dhanyavaad). Use the wall as a brand element and as the anchor for the headline colours.
- **Camera:** a phone on a tripod or handheld, mostly **wide full-body framing** with her head at about **45–52% of frame height** and lots of sky above. Light varies from shot to shot, from blue-pink dusk to warm sunset to a grey, flat evening.

1.2 Source shots (scene cuts measured from the file)

Every cut falls in a speech pause, so you can keep all of them.

Shot	Source time	What's in frame	Use
A	0:00.00–0:06.20	Wide, static. She stands on gravel beside the asphalt highway, with a barbed-wire fence, a field and an electricity pole behind. Pale blue-to-pink dusk sky	Hook (price)
B	0:06.20–0:09.80	She stands **on top of the yellow-and-blue boundary wall** (big blue lettering in the foreground), gesturing out over the rows of plots and poles. Warm orange sunset	Welcome / project name: the hero shot
C	0:09.80–0:12.90	Wide. She walks towards camera down a dirt internal road, with a pole on the right and the sun low behind	"Number 1"
D	0:12.90–0:16.60	Medium-wide. A concrete pole fills the left edge of frame, with the yellow "धन्यवाद" wall behind her on the left	"Number 2"
E	0:16.60–0:21.53	She **walks left to right across the plotted land** towards a tree, past yellow marker pegs. The camera pans with her	"Number 3": roads, walls, poles
F	0:21.53–0:23.90	Wide. She stands in front of a large tree on the plot	Bijli-paani
G	0:23.90–0:28.63	Same tree with a bluer sky. She steps towards camera	School bus
H	0:28.63–0:34.00	She walks towards camera in front of the **long yellow wall ("...वाटिका ॥ धन्य...")** under a flat grey sky	Connectivity
I	0:34.00–0:37.83	Medium-wide in front of another wall section ("धन्यवाद"), with poles and parked cars behind. Bright	Booking fast, Diwali offer
J	0:37.83–0:42.07	Dusk, darker and bluer. She walks in from the left in front of the **"राम देव वाटिका"** wall	CTA

1.3 Transcript (Roman-script Hinglish, source time)

#	Source time	Spoken line
L1	0:00.40–0:02.10	"Sirf **2,80,000** mein..."
L2	0:02.10–0:04.52	"...**Jodhpur** mein **JDA approved**, wo bhi **patta-shuda plot**!"
L3	0:04.72–0:06.00	"Haan, aapne **bilkul sahi** suna."
L4	0:06.19–0:09.25	"Welcome to **Ramdev Vatika Phase 2** by **Mahalakshmi Properties** [verify the developer name]."
L5	0:10.09–0:12.57	"**Number 1**: JDA approved aur **bank loanable**."
L6	0:12.84–0:13.27	"**Number 2**:"
L7	0:13.58–0:16.15	"Main [verify: highway / "IV"] road se **seedha connected**, **60 feet road** par."
L8	0:16.91–0:20.72	"**Number 3**: andar **30 feet wide road**, **boundary walls** aur **light poles** ready."
L9	0:21.74–0:23.52	"Aur **bijli-paani**, wo bhi available."

#	Source time	Spoken line
L10	0:23.99–0:28.23	"Aur dekhiye, **school bus** seedha project ke saamne se. Yaani bachchon ke school ki **tension khatam**."
L11	0:28.78–0:33.94	"**Railway station**, **bus stand**, **market**: **3 kilometre**. Aur **school** aur **hospital** sirf **4 km** door."
L12	0:34.12–0:37.54	"Plots **bahut tezi se book** ho rahe hain, aur ye **offer** sirf **Diwali tak** available hai."
L13	0:38.27–0:41.78	"To **der kis baat ki**? Site visit ke liye abhi **contact** karein **Mahalakshmi Properties**."

Pauses to tighten (cut each to about **0.20 s**, at the existing shot cuts where possible): 0:09.25–0:10.09, 0:16.15–0:16.91, 0:20.72–0:21.74, 0:23.52–0:23.99, 0:28.23–0:28.78 and 0:37.54–0:38.27. That removes about 3.3 s, so the A-roll runs about **38.4 s**. Add the 5.5 s end card and the final reel is about **44 s**, almost exactly the reference's length. The section 7 times are **source time**: keep the structure and re-time it after tightening.

---

2. Colour scheme and grade (taken from this footage)

The reference used peach-orange headlines and a plum/cyan duotone. **Keep the same structure, recoloured** as follows:

Token	Hex	Used for	Replaces (reference)
Headline top	`#FFD978` (sunset marigold, light)	top of the headline gradient	`#F7B183`
Headline bottom	`#F2862E` (sunset orange)	bottom of the headline gradient	`#E8793F`
Headline halo	`#2A0B24` at 40%	soft dark drop-shadow halo behind headlines	black 35–45%
Duotone top	`#C2185B` (deep rani pink, from her kurti)	top half of lower-caption words	plum `#3A0F33`
Duotone bottom	`#1E4FC2` → `#2F6FE0` (royal blue, from the wall lettering and her jeans)	bottom half of lower-caption words	cyan `#1B9AD6` → teal `#2BB3C0`
Wall yellow	`#F5C518`	"approved" stamp ring, distance chips, flash tint	—
Diwali gold	`#FFB703` (core `#FFF1C1`)	diya glow, sparkles, Diwali headline	—
Helper white	`#FFFFFF`	small words, karaoke fillers	same
End-card base	`#0F1E4A` (deep royal navy)	end-card background	plum `#3B1033`
End-card gold	`#E3B04B` → `#C98E2E`	end-card serif type	`#C9935F` → `#B07A4A`

If the developer has an official logo and brand colours, they replace the end-card tokens: `[PLACEHOLDER: logo files and brand hex codes]`.

Footage prep (before you grade):

1. **Conform the variable frame rate to a constant 30 fps** using optical-flow frame interpolation (RIFE or similar), not frame duplication, so walking shots don't judder.
2. **Upscale** 864×1536 to **1080×1920** with a detail-preserving AI upscaler. Punch-ins need extra resolution, so upscale those segments from the original, not from the already-upscaled file.
3. Run **AI person segmentation** on every shot. You need the mask for the headline-behind-head effect and for the intro silhouette flash. Feather it 3 px, and check her loose hair edges against the sky.

Grade: match the reference's **bright, airy, slightly overexposed, low-contrast** look, with consistent warmth across every shot.

- **Match the shots first.** The light changes a lot, from dusk-blue (A, J) to sunset (B, C) to flat grey (H). Warm the cool and grey shots towards the sunset shots (about +300–500 K and a little magenta out of the greens), and lift exposure on J by about +0.5 EV so the CTA doesn't look like a different day.
- Lift the whites and soften the highlights. Keep contrast low.
- Skin should be warm and natural. **Protect the hot pink** from going neon: −10% saturation on the magenta vector only.
- Make the sky a soft gradient of peach at the horizon and pale blue above. A subtle graduated filter on the top 40% helps the headlines stand out.
- Add a gentle **highlight bloom** (glow) and a **subtle vignette** (about 15%), as in the reference.

---

3. Framing and camera movement

Her head sits low in frame (45–52%) with a big sky above. That's **perfect for the reference's headline-behind-head effect**, but you need to set it up deliberately:

- **Wide shots (default):** reframe to about **1.10–1.15×** with her centred, so her head sits at about **38–44% height**. Put the **top headline at 30–40% height**, so the bottom of the letters passes behind her head and hair.
- **Punch-ins (emphasis lines):** instant **1.25–1.35×** jumps on the beat, on L3 ("Haan, aapne bilkul sahi suna"), L6 ("Number 2"), L10 ("tension khatam") and L13 ("der kis baat ki"). Don't go past **1.40×**, because the source can't hold more.
- **Slow drift:** a 100 → 104% push-in across each static shot so nothing sits still. On the walking shots (C, E, H, J), add a slight extra push in the direction she walks.
- **Stabilise** the handheld walking shots lightly (E and H), keeping the natural gimbal-like float.

---

4. Typography system (keep this exactly as in the reference; it is the signature look)

4.1 Top headline (the main keyword)

- **Font:** ultra-heavy slanted geometric sans: **Poppins Black Italic** (or Montserrat Black Italic / Gilroy Heavy Italic). Tight tracking, −20 to −40.
- **Size:** huge, filling about **80–90% of the frame width**.
- **Fill:** vertical gradient, `#FFD978` at the top to `#F2862E` at the bottom.
- **Halo:** a large, soft, dark drop shadow (`#2A0B24` at 40%, blur 30–40 px, offset 6–10 px down and to the right), so the text separates from the bright sky.
- **Depth:** it sits **behind her head and hair** (subject mask), with her head overlapping the letters.
- **Sub-word:** a small secondary word in **Poppins Light Italic**, white, about 30% of the headline's height, tucked into the **lower-right corner** and overlapping it slightly.
- **Optional pre-word:** a small white light-italic word **above-left** of the headline (for example "sirf" above "₹2,80,000").

4.2 Lower caption (chest-to-waist level, in front of her)

- **Position: y ≈ 58–66%**, over her kurti or jeans (never over her face).
- **Main word: Poppins ExtraBold** (or Montserrat Black), upright or slightly italic, with a **duotone split fill**: rani pink `#C2185B` on the top half and royal blue `#1E4FC2 → #2F6FE0` on the bottom half. The split is a soft diagonal or wave mask that animates across the word, with a subtle inner shine.
- **Small white words above** the main word: Poppins SemiBold, white, small.

- **Small white words below** the main word: Poppins Light, white.
- **Karaoke fillers:** tiny white Poppins Regular words flash **one at a time**, in sync with the speech, centred at chest level, for **4–8 frames each**. Use them on the connecting words between headline moments (for example "wo", "bhi", "aur", "yaani", "sirf", "door").

4.3 Special variants (new for this edit, built from the reference's special-variant idea)

- **"₹2,80,000"**: the reference's price treatment. An orange-gradient headline with the rupee symbol, the pre-word "sirf" in thin white italic above-left, and the sub-word "mein" at the lower right. **Falling banknotes** play behind it (section 5).
- **"JDA approved"**: "JDA" as the orange headline, then an **"APPROVED ✓" rubber-stamp badge** that slams in at the lower caption position: a royal-blue (🟦 `#1E4FC2`) distressed stamp ring with a 🟨 `#F5C518` inner ring, rotated −8°, with a 2-frame scale overshoot and a tiny camera shake on impact. This replaces the reference's tricolour "India's" as the one standout graphic.
- **"Number 1 / 2 / 3"**: the digit becomes a **giant outlined numeral** (white 4 px stroke, no fill, about 50% of frame height) behind her on the side she isn't gesturing to. The word "Number" sits small in white italic above it. The numeral holds for the whole point, and the point's key word builds as a normal lower caption in front.
- **"3 km / 4 km"**: small **distance chips**, white rounded pills with a 🟨 `#F5C518` left edge, holding a tiny line icon and text: 🚉 Railway station · 🚌 Bus stand · 🛒 Market → **3 km**, then 🏫 School · 🏥 Hospital → **4 km**. They stack at the lower left, one per spoken word, popping in on the syllable.
- **"Diwali tak"**: the headline "Diwali" uses a **gold fill** (⬜ `#FFF1C1` → 🟧 `#FFB703`) with a warm outer glow instead of the dark halo, plus 2–3 small **diya** icons that flicker at its base and sparkles drifting up.
- **Project name "Ramdev Vatika"**: the headline "Ramdev Vatika", with a sub-word "Phase 2" and a pre-word "Welcome to". Optionally, track a soft **light sweep across the real blue wall lettering** in shot B at the same moment, tying the graphic to the signage.

4.4 Caption spelling style

Roman-script Hinglish, spelled as she says it ("seedha", "bijli-paani", "khatam", "tezi", "kilometre"). English words stay in English ("approved", "bank loanable", "boundary walls", "light poles", "school bus", "offer", "contact"). Write numbers as numerals with the rupee sign: "₹2,80,000", "60 feet", "30 feet", "3 km", "4 km".

---

5. Text animation, overlays and VFX

Text animation (the same rules as the reference):

- **Headline IN (8–10 frames):** scale 130% → 95% → 100% (an overshoot pop), opacity 0 → 100, directional motion blur, and a slight 3D Y-rotation from −15° to 0°. It lands **exactly on the spoken syllable**, on the music beat.
- **Sub-word IN:** starts 4–6 frames after the headline. It slides 20 px in from the right with a fade, or types on quickly.
- **Lower caption IN:** word by word. Each word fades up from blurred to sharp (Gaussian blur 20 → 0) and scales 90 → 100%. The duotone mask wipes left to right over 10–12 frames, so the word shimmers from pink to blue.
- **Hold:** the headline holds for the whole phrase (1.5–4 s) with a 2–3% slow scale-up drift. Headlines often **stay on screen while the lower captions change underneath**.
- **OUT:** a fast blur-out with an opacity drop (5–6 frames), or the text is wiped away by the next transition.

Overlays (PNG sequences or MOVs with alpha):

1. **Falling banknotes** (source 0:00.4–0:04.5): ₹500 notes flutter down across the frame in 3D, with motion blur and depth of field. A few pass in front of her (out of focus) and most pass behind. Use generic notes, not a photo of real currency close-up.
2. **"APPROVED ✓" stamp** (see section 4.3).
3. **Giant outlined numerals** 1, 2 and 3.
4. **Distance chips** with line icons.
5. **Diya flicker and sparkles** around "Diwali", plus a light **golden particle drift** across the whole frame for L12.
6. **Logo badge** for the developer: a royal-blue box with gold serif text, which pops in during the CTA, like the reference's 35.5 s badge. Use `[PLACEHOLDER: logo]`. If there's no logo, set "Mahalakshmi Properties" in the end-card serif.
7. **Warm light leaks** (yellow-orange) for the flash transitions.

---

6. Transition set (the reference's mechanics, mapped to this clip)

Reference transition	Where in this edit (source time)
White-silhouette intro flash: her cut-out fills solid white for 2–3 frames, then reveals the clip while the first headline slams in from blurred	0:00.00, into L1
White light-leak flash (6–8 frames, warm yellow leak); the text glitch-dissolves into white horizontal streaks	0:06.20 (A→B, into "Welcome"), 0:16.60 (D→E, into "Number 3"), 0:28.63 (G→H, into connectivity)
Digital glitch/datamosh (about 10 frames: horizontal block displacement, pixel-sorting slices, RGB split)	0:21.53 (E→F, into "bijli-paani"). A glitch on the electricity line suits the content
Hard cuts on the beat	0:09.80 (B→C), 0:12.90 (C→D), 0:23.90 (F→G), 0:34.00 (H→I), 0:37.83 (I→J)
Punch-in zooms (instant 125–135% jumps)	L3 at 0:04.72, L6 at 0:12.84, L10 "tension khatam" at about 0:27.0, L13 "der kis baat ki" at 0:38.27
Dip to black	After the last word (0:41.78), into the end card

---

7. Shot-by-shot timeline for this clip (source timestamps; re-time after tightening the pauses)

Source time	Speech	Picture	Top headline (behind head)	Lower caption / fillers / overlays	Transition out
0:00.00–0:02.10	L1	**Shot A**, reframed 1.12×	pre-word **"sirf"** → **"₹2,80,000"** (sub-word "mein")	**Falling banknotes** start at 0:00.4	—
0:02.10–0:04.52	L2	Shot A	**"Jodhpur"** (sub-word "mein")	**"JDA"** small above → **APPROVED ✓ stamp** slam on "approved" → filler "wo" · "bhi" → lower **"patta-shuda"** (small white "plot" below). Banknotes finish falling	Punch-in on the beat
0:04.72–0:06.00	L3	Shot A, **punch-in 1.30×**	— (let her face carry it)	Small "Haan," above → lower **"bilkul sahi"** (small white "suna" below)	**White light-leak flash** at 0:06.20
0:06.19–0:09.25	L4	**Shot B** (on the wall at sunset), with a slow push	pre-word **"Welcome to"** → **"Ramdev Vatika"** (sub-word **"Phase 2"**). Light sweep across the real wall lettering	Small "by" above → lower **"Mahalakshmi"** (small white "Properties" below)	Hard cut at 0:09.80

Source time	Speech	Picture	Top headline (behind head)	Lower caption / fillers / overlays	Transition out
0:10.09–0:12.57	L5	**Shot C** (walking towards camera)	Giant outlined **"1"**, small "Number" above it	Lower **"JDA approved"**, then filler "aur" → lower **"bank loanable"**	Hard cut at 0:12.90
0:12.84–0:13.27	L6	End of Shot C, **punch-in 1.30×**	Giant outlined **"2"**	—	—
0:13.58–0:16.15	L7	**Shot D**	**"60 feet"** (sub-word "road par")	Small "Main road se" above → lower **"seedha"** (small white "connected" below)	**White light-leak flash** at 0:16.60
0:16.91–0:20.72	L8	**Shot E** (walking across the plots; pan)	Giant outlined **"3"**, then the headline **"30 feet"** (sub-word "wide road") replaces it on "tees"	Small "andar" above. Then lower captions in quick succession: **"boundary walls"** → filler "aur" → **"light poles"** (small white "ready" below)	**Glitch/datamosh** at 0:21.53
0:21.74–0:23.52	L9	**Shot F** (tree)	**"Bijli-paani"** (sub-word "available")	Fillers "wo" · "bhi"	Hard cut at 0:23.90
0:23.99–0:28.23	L10	**Shot G** (tree, blue sky); **punch-in 1.30×** at "tension khatam"	**"School bus"** (sub-word "seedha saamne")	Small "project ke" above → lower **"saamne"**. Then filler "yaani" → lower **"tension"** (small white "khatam" below, with a tiny camera shake on "khatam")	**White light-leak flash** at 0:28.63
0:28.78–0:33.94	L11	**Shot H** (walking along the yellow wall)	**"3 km"**, then **"4 km"** (sub-word "door") replaces it	**Distance chips** stack at the lower left on each spoken word: Railway station · Bus stand · Market → **3 km**, then School · Hospital → **4 km**. Filler "sirf"	Hard cut at 0:34.00
0:34.12–0:37.54	L12	**Shot I**	**"Diwali"** (gold variant, with diyas and sparkles; sub-word "tak") lands on "Diwali"	Lower **"bahut tezi se"** (small white "book ho rahe hain" below) → filler "offer" · "sirf". **Golden particle drift** across the frame	Hard cut at 0:37.83
0:38.27–0:41.78	L13	**Shot J** (dusk, wall signage), **punch-in 1.25×** on "der kis baat ki", then back to wide on "contact"	**"Der kis baat ki?"** (one headline, two lines if needed)	Small "Site visit ke liye" above → lower **"contact"** (small white "karein" below). The **logo badge** pops in at about 0:40.8 with a sparkle	**Dip to black** after 0:41.78
End card (5.5 s)	— (music only)	Deep royal-navy ■ `#0F1E4A` background, with a **marigold-and-diya festive border** along the bottom 10% (replacing the reference's paisley border, and matching the Diwali offer)	Gold serif tagline types on letter by letter: **"Ramdev Vatika · Phase 2"**	Below it, the developer's name or logo in large gold serif: **"Mahalakshmi Properties"**. Then a line *"Plots from ₹2,80,000"** · **"Offer valid till Diwali"** · **"📞 `[PLACEHOLDER: phone]` "** · **" `[PLACEHOLDER: JDA approval no.]` "**. The logo slowly scales from 100 → 108%. Tiny `[PLACEHOLDER: RERA / disclaimer]` text at the top and bottom, and **"*T&C APPLY"* at the bottom right	Fade to black over the last 0.8 s

End-card typography: a classic high-contrast serif (**Cinzel** / Trajan Pro / Playfair Display SC) for the logo and project name, and **Playfair Display Regular** for the tagline and info lines. Flat ■ `#E3B04B` → ■ `#C98E2E` gold, no shadow.

8. Optional B-roll

The reference cut to 3 B-roll shots of the project's scale model (about 3 s in total) after the hook. This footage has none, and the raw edit works without it. If you want the same rhythm, add **2–3 s of real drone or wide footage of the plots** after L4 (0:09.25), with her voice continuing over it. If you can't get real footage, use a slow push-in on shot B's wide view of the plot rows.

Don't generate fake aerials or renders of the colony. In a property ad, made-up visuals of the site would mislead buyers. Use only real footage or a clearly labelled layout plan: `[PLACEHOLDER: real drone clip / site layout map]`.

---

9. Sound design

- **Music bed:** an upbeat, modern **house/corporate-pop groove at about 128 BPM** (a four-on-the-floor kick every 0.47 s, bright plucks and claps, no vocals), as in the reference. For the Diwali angle, add light **dhol or tabla fills** on the section changes and a short **shehnai or flute** phrase under "Diwali tak". Duck the music about **−14 dB under her voice** with sidechain ducking. **Cut every edit and text pop on the kick.**
- **SFX** (sync exactly):
  - **0:00.0:** a short swoosh + bass impact on the intro silhouette flash.
  - **Every top-headline pop:** a soft, airy whoosh/swish (6–10 frames).
  - **Every lower duotone word:** a subtle pop, click or light "tick".
  - **0:00.4–0:02.5:** a cash register **"cha-ching"** + paper money flutter as the notes fall.
  - **"approved" (about 0:03.3):** a heavy **rubber-stamp thud** with a tiny low-end boom.
  - **Into each white flash (0:06.2, 0:16.6, 0:28.6):** a reverse riser into a cinematic hit with a reverb tail.
  - **Number 1 / 2 / 3:** a punchy "tock" or snare hit as each numeral lands.
  - **0:21.5:** a digital glitch / data stutter, with an electrical buzz (8–10 frames).
  - **Punch-ins:** a quick zoom whoosh.
  - **Distance chips:** a light UI "blip" per chip, rising in pitch.
  - **"Diwali":** a sparkle shimmer + a soft **firecracker crackle** in the distance (no loud bang).
  - **Logo badge:** a shimmer/sparkle.
  - **End card:** the music switches to an **elegant outro swell** (warm pads, soft piano or sitar, light chimes) while the tagline types on, with optional subtle typewriter ticks. Fade out over the last 0.8 s.
- **Voice:** it's recorded outdoors on the phone mic. Apply a high-pass at 90 Hz, **AI wind and background-noise reduction** (moderate, so she doesn't sound processed), a gentle de-esser and 3:1 compression. The source measures **−16.4 LUFS with a true peak of +0.1 dBFS** (it already touches clipping), so put a limiter on it, bring it up, and normalise the finished mix to **−14 LUFS integrated, −1 dBTP**. Removing the pauses creates hard edits in the room tone, so cross-fade them over 2–3 frames.

---

10. QC checklist before export

- [ ] Every caption is in sync with the speech (±2 frames) and spelled in Hinglish as she says it.
- [ ] Every **[verify]** item in section 1.3 is checked against the audio, and every `[PLACEHOLDER]` is listed for me.
- [ ] No on-screen number, approval, name or offer appears that she didn't say or that isn't on the wall signage.
- [ ] Her face is never covered. Headlines sit behind her head with a clean mask: no halo around her hair, and no letters "popping through" her head.
- [ ] Shots A–J are matched in warmth and exposure, and shot J (dusk) doesn't look like a different day.
- [ ] The VFR source is conformed to a constant 30 fps with no stutter on the walking shots.

- [ ] No punch-in goes beyond 1.40×, and nothing looks soft or blocky.
- [ ] Every accent colour comes from the section 2 palette, and no plum or cyan is left over from the reference.
- [ ] A visual change at least every 2 s, and no static frame longer than 3 s.
- [ ] All text sits inside the safe zone: 150 px from the top, 320 px from the bottom, 60 px from the sides. The distance chips and the end-card info stay clear of the Reels UI on the right edge.
- [ ] Audio is at −14 LUFS with no clipping, the music ducks under every word, and there are no clicks at the pause cuts.

11. Export and deliverables

- **Video:** H.264 MP4, 1080×1920, 30 fps, 14–16 Mbps VBR, AAC 320 kbps stereo, Rec.709. Length about 44 s.
- **Also deliver:**
  1. the filled-in caption plan table (time · speech · headline · sub-word · lower caption · fillers · overlay · SFX)
  2. a list of every `[PLACEHOLDER]` and **[verify]** item I need to confirm
  3. a **no-text version** (clean picture + final audio) for re-captioning later
  4. the project/source files, if you built the edit in code or a timeline.
